

A highly efficient and portable  
**Solar Water Pump**

# sunlight pump

**A sustainable solution to cover the water needs of farmers and communities.**

The sunlight pump is a portable solar water pump for smallholder irrigation and domestic water supply. It is a CO<sub>2</sub>-free, economic technology that combines income, productivity and labor-saving benefits. ennos irrigation systems produce more crop per drop and promote a more sustainable use of the resources energy and water.

## Main advantages of the sunlight pump:

- Portable
- No operational costs
- High quality technology
- Easy to install and maintain
- No CO<sub>2</sub> emissions
- Solar-powered

## The Solar Pump with multiple Applications:

**Irrigation**

**Drinking water**

**Sanitation & hygiene**
